Marshall ELECTRIC
Food Equipment Service

PERFORMANCE CHECK CRITERIA

A Performance Check is provided by the Service Agency at their convenience and within 7-10 working days after the request has been made, and at normal business hours of 8:30 am - 4:30 pm. Prior to requesting a Performance Check, the following list must be checked off:

- ❑ The equipment has been up and running for at least 7 days.
- ❑ All utilities (i.e. electric, gas, water) hoods, drains, etc. are per equipment requirements.
- ❑ All adjustments, leveling, etc. are performed.
- ❑ If the equipment is damaged or items are missing the factory must be informed.
- ❑ The following equipment listed in the chart to the right is ready for a performance check

I am aware that my company will be responsible to pay the service agency to return to the location to complete the performance check at the service agency's regular street billing rate if any of the above has not been completed.
